HANNAN METALS LTD.
NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS
FOR THE NINE MONTHS ENDED FEBRUARY 28, 2026
(Unaudited - Expressed in Canadian Dollars)

1. Nature of Operations

Hannan Metals Ltd. (the “Company”) was incorporated under the provisions of the Company Act (British Columbia). The Company’s common shares currently trade on the TSX Venture Exchange (“TSXV”) under the symbol “HAN”. The Company’s principal, registered and records office is located at #1305 - 1090 West Georgia Street, Vancouver, British Columbia V6E 3V7.

The Company is a junior mineral exploration company engaged in the acquisition and exploration of mineral properties. As at February 28, 2026 the Company has not earned any production revenue, nor has it determined whether these properties contain economically recoverable ore reserves. The underlying value of the mineral resource interests is entirely dependent on the existence of economically recoverable reserves, the ability of the Company to obtain the necessary financing to complete exploration and development and upon future profitable production. Mineral resource interests represent costs incurred to date, less amounts amortized and/or written off, and do not necessarily represent present or future values. As a mineral company in the exploration stage the ability of the Company to complete the exploration and development of its mineral property interests will be affected primarily by its ability to raise adequate amounts of capital through equity financings, debt financings, joint venturing of projects and other means.

The Company’s primary mineral properties are located in Peru and, consequently, the Company is subject to certain risks, including currency fluctuations and possible political or economic instability which may result in the impairment or loss of mining title or other mineral rights, and mineral exploration and mining activities may be affected in varying degrees by political stability and governmental regulations relating to the mining industry.

The Company has a history of losses with no operating revenues and, as at February 28, 2026, the Company had working capital of \$7,741,478. The Company’s San Martin JV Project is funded by an arms length party, as described in Note 5(a)(i), under an option agreement and its other mineral property interests and operations are funded from equity financings. These condensed consolidated interim financial statements have been prepared on a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business operations for the foreseeable future. To date the Company has not earned any revenue and is considered to be in the exploration stage. The Company’s operations are funded from equity financings which are dependent upon many external factors and may be difficult to impossible to secure or raise when required. Management considers that the Company has adequate resources to maintain its core operations and conduct planned exploration of its existing exploration and evaluation assets for the next twelve months. However, the Company recognizes that exploration expenditures may change with ongoing results and, as a result, it may be required to obtain additional financing. While the Company has been successful in securing financings in the past there can be no assurance that it will be able to do so in the future.

2. Basis of Preparation

Statement of Compliance

These condensed consolidated interim financial statements have been presented in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (“IASB”), applicable to the preparation of interim financial statements, including IAS 34, *Interim Financial Reporting*. The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

Basis of Measurement

The Company’s condensed consolidated interim financial statements have been prepared on the historical cost basis except for the revaluation of certain financial assets and financial liabilities to fair value. These condensed consolidated interim financial statements are presented in Canadian dollars unless otherwise stated.

2. Basis of Preparation (continued)

Details of the Group

In addition to the Company, the consolidated financial statements include all subsidiaries. Subsidiaries are all corporations over which the Company is able, directly or indirectly, to control financial and operating policies, which is the authority usually connected with holding majority voting rights. Subsidiaries are fully consolidated from the date on which control is acquired by the Company. Inter-company transactions and balances are eliminated upon consolidation. They are de-consolidated from the date that control by the Company ceases.

The subsidiaries of the Company are as follows:

<u>Company</u>	<u>Location of Incorporation</u>	<u>Ownership Interest</u>
Hannan Metals BC Ltd.	Canada	100%
Hannan Metals Peru Ltd.	Canada	100%
Hannan Metals Ireland Limited	Ireland	100%
Hannan Metals Peru S.A.C.	Peru	100%
Hannan Resources Peru S.A.C.	Peru	100%
Hannan Servicios Peru S.A.C.	Peru	100%

3. Material Accounting Policy Information

These condensed consolidated interim financial statements have been prepared on a basis consistent with the material accounting policies disclosed in the consolidated financial statements for the year ended May 31, 2025. Accordingly, they should be read in conjunction with the consolidated financial statements for the year ended May 31, 2025.

Accounting Standards Issued but Not Yet Effective

IFRS 18, *Presentation and Disclosure in Financial Statements*, which will replace IAS 1, *Presentation of Financial Statements* aims to improve how companies communicate in their financial statements, with a focus on information about financial performance in the statement of profit or loss, in particular additional defined subtotals, disclosures about management-defined performance measures and new principles for aggregation and disaggregation of information. IFRS 18 is accompanied by limited amendments to the requirements in IAS 7 *Statement of Cash Flows*. IFRS 18 is effective from January 1, 2027. Companies are permitted to apply IFRS 18 before that date.

The Company is assessing the impact of the adoption of IFRS 18 and working to identify all impacts the changes will have on the Company's financial statements.

(a) *San Martin JV Project*

On November 27, 2020, as amended, the Company entered into a binding letter agreement for an option and joint venture agreement (the "Agreement") with Japan Organization for Metals and Energy Security ("JOGMEC"). Under the Agreement, JOGMEC has the option to earn up to a 75% interest in mining concessions in San Martin Province of the Department of San Martin, northern Peru (the "San Martin JV Project").

The Agreement grants JOGMEC the option to earn an initial 51% interest by funding US \$8,000,000 in project expenditures on the San Martin JV Project by March 31, 2028, subject to acceleration at JOGMEC's discretion.

JOGMEC, at its election, can then earn:

- an additional 16% interest for a total 67% interest by achieving either a prefeasibility study or funding a further US \$12,000,000 in project expenditures in amounts of at least US \$1,000,000 per annum (for a US \$20,000,000 total expenditure); and,
- subject to owning a 67% interest, a further 8% interest for a total 75% interest by achieving either a feasibility study or funding a further US \$15,000,000 in project expenditures in amounts of at least US \$1,000,000 per annum (for a US \$35,000,000 total expenditure).

Should JOGMEC not proceed to a prefeasibility study or spend US \$20,000,000 in total, the Company shall have the right to purchase from JOGMEC for US \$1, a 2% interest, whereby the Company's interest will be increased to 51% and JOGMEC's interest will be reduced to 49%.

At the completion of a feasibility study, JOGMEC has the right to either:

- purchase up to an additional 10% interest from the Company (for a total 85% interest) at fair value as determined in accordance with internationally recognized professional standards by an agreed upon independent third-party valuator; or
- receive up to an additional 10% interest from the Company (for a total 85% interest) in consideration of JOGMEC's agreement to fund development of the San Martin JV Project, by loan carrying the Company until the San Martin JV Project generates positive cash flow.

After US \$35,000,000 has been spent by JOGMEC and before a feasibility study has been achieved, both parties will fund expenditures pro rata or dilute via a standard industry dilution formula:

- if the interest in any party is diluted to less than 5% then that party's interest will be automatically converted to a 2% net smelter royalty ("NSR"), and the other party may at any time purchase 1% of the 2% NSR for a cash payment of US \$1,000,000; and
- the Company will manage exploration at least until JOGMEC earns a 51% interest, after which the majority interest holder will be entitled to act as the operator of the San Martin JV Project.

(b) *Valiente Project*

The Valiente Project comprises mining concessions held by the Company and is located in central eastern Peru.

6. Share Capital

(a) ***Authorized Share Capital***

The Company's authorized share capital consists of an unlimited number of common shares without par value. All issued common shares are fully paid.

(b) ***Equity Financings***

Nine Months Ended February 28, 2026

During November and December 2025 the Company completed a non-brokered private placement totalling 12,181,671 common shares, at a price of \$0.75 per share, for proceeds of \$9,136,253. The Company paid cash finders' fees of \$439,545 to arm's length finders and \$49,284 for legal and other costs associated with this private placement.

Fiscal 2025

On June 27, 2024 the Company completed a non-brokered private placement of 10,593,513 units at \$0.35 per unit, for total proceeds of \$3,707,730. Each unit comprised one common share and one-half of a share purchase warrant. Each whole warrant entitled the holder to purchase an additional common share at a price of \$0.50 per share on or before June 27, 2026. All of these warrants have been exercised or have expired as at February 28, 2026. Directors, a spouse of a director and officers of the Company purchased a total of 315,571 units of the private placement.

The Company incurred \$26,466 for legal and other costs associated with this private placement.

(c) ***Warrants***

A summary of the number of common shares reserved pursuant to the Company's outstanding warrants at February 28, 2026 and 2025 and the changes for the nine months ended on those dates, is as follows:

(d) ***Share Option Plan***

The Company has established a rolling share option plan (the "Plan") in which the maximum number of common shares which can be reserved for issuance under the Plan is 10% of the issued and outstanding shares of the Company. The minimum exercise price of the options is set at the Company's closing share price on the day before the grant date, less allowable discounts. Options granted may be subject to vesting provisions as determined by the Board of Directors and have a maximum term of ten years. The Plan permits the holder of share options to exercise cashless (net exercise) by surrendering a portion of the underlying share option shares to pay for the exercise cost.

6. Share Capital (continued)

During the nine months ended February 28, 2026 the Company granted share options to purchase 500,000 (2025 - 2,036,700) common shares of the Company and recorded compensation expense of \$196,037 (2025 - \$814,680). In addition, during the nine months ended February 28, 2025 the Company recorded compensation expense of \$12,972 on the vesting of share options previously granted.

The fair value of share options granted during the nine months ended February 28, 2026 and 2025 was estimated using the Black-Scholes Option Pricing Model using the following assumptions:

	<u>2026</u>	<u>2025</u>
Risk-free interest rate	2.94%	2.75%
Estimated volatility	85%	94%
Expected life	5 years	5 years
Expected dividend yield	0%	0%
Estimated forfeiture rate	0%	0%

The estimated volatility was based on the historical share prices of the Company. The weighted average grant date fair value of all share options granted during the nine months ended February 28, 2026 was \$0.64 (2025 - \$0.40) per share option.

Option-pricing models require the use of estimates and assumptions including the expected volatility. Changes in the underlying assumptions can materially affect the fair value estimates and, therefore, existing models do not necessarily provide a reliable measure of the fair value of the Company's share options.

A summary of the Company's share options at February 28, 2026 and 2025 and the changes for the nine months ended on those dates, is as follows:

	<u>2026</u>		<u>2025</u>	
	Number of Options Outstanding	Weighted Average Exercise Price \$	Number of Options Outstanding	Weighted Average Exercise Price \$

During the nine months ended February 28, 2025 the Company also recorded \$30,000 share-based compensation for share options granted to Chase.

8. Financial Instruments and Risk Management

Categories of Financial Assets and Financial Liabilities

Financial instruments are classified into one of the following categories: fair value through profit or loss (“FVTPL”); amortized cost; and fair value through other comprehensive income (“FVOCI”). The carrying values of the Company’s financial instruments are classified into the following categories:

Financial Instrument	Category	February 28, 2026 \$	May 31, 2025 \$
Cash	Amortized cost	7,741,562	2,273,267
Accounts payable and accrued liabilities	Amortized cost	(200,474)	(305,869)

8. Financial Instruments and Risk Management (continued)

The Company's financial instruments recorded at fair value require disclosure about how the fair value was determined based on significant levels of inputs described in the following hierarchy:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reporting date. Active markets are those in which transactions occur in sufficient frequency and value to provide pricing information on an ongoing basis.

Level 2 - Pricing inputs are other than quoted prices in active markets included in Level 1. Prices in Level 2 are either directly or indirectly observable as of the reporting date. Level 2 valuations are based on inputs including quoted forward prices for commodities, time value and volatility factors, which can be substantially observed or corroborated in the market place.

Level 3 - Valuations in this level are those with inputs for the asset or liability that are not based on observable market data.

The recorded amounts for cash and accounts payable and accrued liabilities approximate their fair value due to the short term to maturity.

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit Risk

Credit risk is the risk of loss associated with a counterparty's inability to fulfill its payment obligations. The Company's credit risk is primarily attributable to cash. Management believes that the credit risk concentration with respect to cash is remote as cash is held with high quality financial institutions.

Liquidity Risk

Liquidity risk is the risk that the Company will not have the resources to meet its obligations as they fall due. The Company manages this risk by closely monitoring cash forecasts and managing resources to ensure that it will have sufficient liquidity to meet its obligations. The following table is based on the contractual maturity dates of financial assets and the earliest date on which the Company can be required to settle financial liabilities.

	Contractual Maturity Analysis at February 28, 2026				
	Less than 3 Months \$	3 - 12 Months \$	1 - 5 Years \$	Over 5 Years \$	Total \$
Cash	7,741,562	-	-	-	7,741,562
Accounts payable and accrued liabilities	(200,474)	-	-	-	(200,474)

Market Risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices. These fluctuations may be significant.

(a) Interest Rate Risk

The Company is exposed to interest rate risk to the extent that the cash bears floating rates of interest. The interest rate risk on cash is not considered significant. The Company has no interest bearing debt.

8. Financial Instruments and Risk Management (continued)

(b) Foreign Currency Risk

The Company's functional currency is the Canadian dollar. The Company maintains foreign currency bank accounts to support the cash needs of its foreign operations. Management believes the foreign exchange risk related to currency conversions is minimal and therefore does not hedge its foreign exchange risk. At February 28, 2026, 1 Canadian Dollar was equal to 2.46 Peruvian Nuevo Soles, 0.62 Euro, and 0.72 US Dollar.

Balances are as follows

	Nuevo Soles	Euros	US Dollars	CDN \$ Equivalent
Cash	266,568	5,764	304,889	541,115
VAT receivable	-	589	-	950
Accounts payable and accrued liabilities	<u>(269,800)</u>	<u>(5,333)</u>	<u>-</u>	<u>(118,276)</u>
	<u>(3,232)</u>	<u>1,020</u>	<u>304,889</u>	<u>423,789</u>

Based on the net exposures as of February 28, 2026 and assuming that all other variables remain constant, a 10% fluctuation on the Canadian Dollar against the Peruvian Nuevo Sole, Euro and US Dollar would result in the Company's net loss and comprehensive loss being approximately \$34,000 higher (or lower).

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business. The Company defines capital that it manages as share capital and cash. The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so. Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable.

The Company's share capital is not subject to any external restrictions. The Company has not paid or declared any dividends since the date of incorporation, nor are any currently contemplated. There have been no changes to the Company's approach to capital management during the period.

9. Segmented Information

The Company operates in one reportable segment, being the exploration and evaluation of unproven exploration and evaluation assets. The Company's exploration and evaluation assets are located in Peru and its corporate assets, comprising mainly of cash, are located in Canada. The Company is in the exploration stage and has no reportable segment revenues or operating results.

The Company's total assets are segmented geographically as follows:

	As at February 28, 2026			
	Canada \$	Ireland \$	Peru \$	Total \$
